**thoughts, observations, sketches:**

***If you get a chance to chat with folks – such as, if they ask what you are doing . . .***

Tell them a little bit about the work we do – advocating for and maintaining local trails. Getting real numbers about who is using the trail really helps with this work.

Bring with you some handouts, such as a CVTA brochure – these also direct them to where they can get more info.

And, very important, ask them to share their observations about the trail. How often do they use it? What uses do they see? What work do they want done on the trail?
